

GloSpamShield™ – The Ultimate Spam-Blocking Solution **\$39.95/year**

Stop Spam That Costs You Time and Money

Spam is costly, wasting both your time and money with things you don't want, don't need, and didn't ask for. Sorting through spam is frustrating and may even cause you to accidentally miss important e-mails. Even if you end up not opening those emails, spammers are taking your valuable time and energy as you sort and delete.

Take Back Control of Your E-mails

Globat.com's GloSpamShield identifies spam on a sever level well before it reaches your inbox. This means no software to download or install, and if you use an e-mail client like Outlook or Apple Mail, you won't need to make changes to your program settings. You'll easily see your important, legitimate e-mails without spam cluttering your inbox.

With GloSpamShield, you have a choice of 5 spam-filtering levels which you can set for each of your domain's e-mail accounts. Select "Low" to block only the most blatant spam messages, or "High" to aggressively block almost all spam e-mails. Adjust to your needs by choosing the "Medium" or "Medium High" level, and for more advanced filtering, choose the "Custom" level to set your own filtering criteria. There's even a whitelisting feature where you specify safe senders to avoid them from ever being blocked.

GloSpamShield's extraordinary spam-blocking features include:

- Expert spam-filtering technology at the server level
- No software to download or install
- No need to adjust your e-mail client if you use Outlook, Apple Mail, Outlook Express, etc.
- 5 levels of spam filtering, including a custom level
- Unlimited users: activate GloSpamShield for all e-mail accounts on your domain
- Whitelist your safe senders
- Filtered emails are held in quarantine instead of being immediately deleted

Upgrade to GloSpamShield today and end the assault of spam on your inbox.
